Advisory - the following lyrics contain explicit language:

We bust the sound the kids all gather round
And what's comin' from their radios, they all turn down
The creativeness, we are scientists
Move 'em with soul, move 'em with this When the bass kicks, we get intimate
With the music and the people, yeah they're into it
And takin' off crusin' through the air
The sound is aerodynamic, let me take you there I am a cool and mellow man, always got a plan
Copin' out problems every time I can
I'd like to be known as a great communicator
If you got beef don't save it for later I battle evil weekly monthly yearly
But every step I take, the devil stays near me
Otherwise maintain on the globe
Just another space trippin' vato Massive yang and yin on this earth we spin
Sometimes I gotta center find out who I am
I chill out, I let in the wind
I gotta feel the pulse for the planet on my skin I got news for ya it ain't nothin' nice
We all got demons we all gotta advice
The struggle never ends to keep it in check
But I never stop trying to make the trek, what up Which one is it who you gonna believe
Undivided in my material being
Undivided life you can't fade me
Desperate the cling I make to positivieri Stay getting it on 'til the doubt is gone
You could be dissuaded you were dead all along
Like what's up now you can't fade me
Still in the same old trade of positivieri
