

# Fangz

## The Ready Set

Fangs, fangs, fangs, fangs We're nothing like they thought we'd turn out to be  
Hard to swallow, yeah, that happened naturally  
No point deceiving, I think the world should see us for what we are  
For what we really are Stack up your fears, that shit you'll never need  
You've got that spark, I've got this gasoline  
We'll watch it burn, watch it ember out  
We're on our own now, now, now Don't let go, you are in control and you're ready  
Take what's yours, come on now and let them (let them, let them, let them)  
Let em see your fangs (Fangs, fangs) see your fangs (x2) The bitter, the better, yeah if it's all the same  
We sick of swimming against these tidal waves  
Never gonna fit in, living life like we're misfits  
That's what we are, that's what we really are So throw your hands up higher if you're feelin' me  
And break the mold tonight until we're recklessly  
We'll watch it burn, watch it ember out  
We're running in now, now, now Don't let go, you are in control and you're ready  
Take what's yours, come on now and let them (let them, let them, let them)  
Let em see your fangs (fangs) (Fangs, fangs) see your fangs (x2) Never, never let your lights out  
Never, never try to hide out  
From the world, it's like staring at the sun So don't let go, you are in control and you're ready  
Take what's yours, come on now and let them (let them, let them, let them)  
Let em see your fangs (Fangs, fangs) see your fangs (x2)
