

Dream Big

Isac Elliot

Dream big, don't you be afraid
Dream big, you will find your way
Dream big, don't you be afraid
Dream big, you will find your way

Come on girl, lets dream together now

Just close your eyes and imagine
And never let the haters bring you down
Luck is related to passion
Keep aiming for the stars and you'll leave the ground

They say the sky is the limit
But baby we've been on the moon
This is your life, gotta live it
And know that you are not alone

Dream big, don't you be afraid
Dream big, you will find your way, yeah
Dream big, don't you be afraid
Dream big, you will find your way

You're a star in the making
You can have it all if you dare to try
The world is yours for the taking
But dreams are only dreams til you make them fly

They say the sky is the limit
But baby we've been on the moon
This is your life, gotta live it
And know that you are not alone

Dream big, don't you be afraid
Dream big, you will find your way, yeah
Dream big, don't you be afraid
Dream big, you will find your way, yeah

Dream big, you will find your way
