

Lady Xanax

Duran Duran

Here comes the morning light you can't face
Lie on your bed staring into space
Watch the time slip gently by
Don't ask why So many friends but nobody calls
Can't be alone when the darkness falls
Got to make it to the party
Socialize, break the ice Oh Lady Xanax, where were you last night?
All the cracks in your makeup are starting to show
Don't think that you realize how far away you go now
Look into the future and don't be afraid
Afraid of what is on your mind There in the emptiness deep inside
You are the one that's been left behind
So you paint with your mascara
Social eyes, don't look twice Oh Lady Xanax, where were you last night?
All the cracks in your makeup are starting to show
Don't think that you realize how far away you go now
Look into the future and don't be afraid, afraid Lady Xanax, you're out tonight
Lady Xanax, you're oh so tired
Lady Xanax, sleep well tonight Lady Xanax
Lady Xanax
Lady Xanax
