

The Chance Of Love

Chris Rea

You and me, we're both the same
It's this life a lonely game
I used to be a happy man
And now I understand
Just what it's all about
I never had a doubt
On the chance of love
As a boy, I lived down here
I always saw you near
To be together was happiness
And I just can't forget
The moment we first kissed
I'd like to try again

On the chance of love
Yeah, on the chance of love
I'll do anything to get you by my side
On the sound of love
I will love you girl, you'll be mine
All the world would then be free
An apple falls from an apple tree
You and I will be together
And you will understand
When I first take your hand
I'll open up the door
To the chance of love
