To Sirius

Gojira

Now from a solar system To another I fly I come with life in my veins Through darkened space I ran I left a struggle behind And faced the fear thats alive I lost a world and traveled Straight across from the sky To find the gates of the heartI come to Sirius C To learn from you friends of old And wish to come into being And behold Im with you I am ready now to go The distance and even beyond Recover all my forces All the strength of the world And feel the light into me From the strength of god

We go to the power of goddess

This place is a throne

For brightness

The age of war is overFor gods sake

The have never heard of you

Youll never reach

This master race

Our force sickening

Killing all the time

Human laws

Already slayed many livesThere was a streak of madness

But now I know

I see its not the only truth

The scars in me are opened

Wont you please call me beyondCrave affection love and courage

Being courageous

And flying instead of

Falling down

Follow these instructions

Ive been given

In this dream awakeThere is no goal to reach now

Leviathans
No complaint it all
Dolphins from upper space
Are in front of me
In present they dwellThis is my way
Ive found my home
My state of real
There is no goal to reach
This is my way
