

Too Proud

Dave Patten

I never said anything cause I was just too proud
But now that I'm looking again, it's all I think about
See I should have told you, but I kept it all inside yeah
And I can't do everything but at least I know I tried
Oh yeah

They never mean the words they say, so take it back they'll fade away
And time will tell take it from me just stick around just take a seat
They never think before they say you twist it up some other way
It's hard to tell when you were wrong so hurry up before they're gone
See I've been avoiding cause I know how much it hurts

And I'll keep on waiting cause I know we'll make it work
And this is a different day a better kind of (kinder) sound
Before I was blinded but I see it clearly now
They never mean the words they say, so take it back they'll fade away

And time will tell take it from me just stick around just take a seat
They never think before they say you twist it up some other way
It's hard to tell when you were wrong so hurry up before they're gone
They were wrong you knew it then what you saw was not in plan

You went off don't understand now you wont give them the chance
Don't you see you're holding back they don't mean what they said then
Gotta give them back a chance or you'll both be a lone
They never mean the words they say, so take it back they'll fade away

And time will tell take it from me just stick around just take a seat
They never think before they say you twist it up some other way
It's hard to tell when you were wrong so hurry up before they're gone
Before they're gone
