Close Your Eyes

Young Love

Close your eyes

Don't want you to see where I'm taking you tonight

Let's just say it's a surprise seeing you again

What a surprise to be with you again I'm a man on the scene

See you around the same way I always do

See you around the same way I always do

See you around, you know I'm hoping toWhere are we going, have we gone too far

Losing our clothing, have we gone too far

Have we gone too far, have we gone too far

Have we gone too farWhat a surprise seeing you again

What a surprise to be with you again

See you around the same way I always do

See you around, you know I'm hoping toWhat a surprise seeing you again

What a surprise to be with you again

See you around the same way I always do

See you around, you know I'm hoping to(What a surprise, what a surprise)

Where are we going?

Just close your eyes till we get there

(What a surprise, what a surprise)

You won't know where I hope I see you around the way I always do you

It's always a surprise to be with you

I hope I see you around the way I always do you

It's always a surprise to be with you
