

# Mission Profile (Live in Switzerland)

## Threshold

can we go on can we be strongwe've got a system you're going to use it  
we call it freedom and you are free to choose it  
if you're not against it you've got to be for it  
neutral is dangerous and you cannot ignore itcan we go on forcing our hand  
can we be strong till others understand  
can we go on to save our wounded land  
can we be wrongwe've got the money we're going to spend it  
peace is our mission we'll murder to defend it  
sooner or later you'll get the picture  
we're the creator and you were just createddevastation is where we're heading if we follow this illusion  
escalation of all the hurting that is borne of our confusion  
unrelenting as we persist in putting everyone beneath us  
never ending until we understand our honesty deceives usthere is still one truth on which we can depend  
we've started something we can never endwe know although we try to justify the means  
the truth behind the end remains unseen  
and while we all assume we all agree  
we're giving up the freedom to be freedillusion is always possible but we've got propaganda  
mass confusion is always better than the threat of understanding  
we'll deceive you we've got so many ways to make you stand behind us  
if we need to we'll use them on ourselves to constantly remind usthere is just one lie that we can still defend  
we've started something we can never endwe know although we try to justify the means  
the truth behind the end remains unseen  
and while we all assume we all agree  
we're giving up the freedom to be freethere is still one truth on which we can depend  
we've started something we can never endwe know although we try to justify the means  
the truth behind the end remains unseen  
and while we all assume we all agree  
we're giving up the freedom to be free
