Try Your Best

BRS

I can't do it any quicker
I don't want it any slicker
As far as the eye can see
Is miles and miles of icy seaSo try your best
And think about it later
Or you will never knowI don't feel fear anymore
But I can't risk getting mauled
As far as the ear can hear
The wave is coming loud and clearSo try your best
And think about it later
Or you will never knowSo try your best
And think about it later
Or you will never know
Which way your life could go
And you'll know when you knowSo try your best
And think about it later
Or you will never know
Which way your life could go
And you'll know when you know
