

# Winter

## TV on the Radio

Oh, it's the winter of the wanted  
Yeah, it's the hardest part of nature  
Lord, have mercy on this creature  
Give me some heat, I know you've got it  
And who knows what the summer's gonna bring us?  
Comes on slow, gotta keep the fire in us So completely in the dark now  
I hope that night will last forever  
Yeah, you know I like it better  
When we're a little bit frightened  
And who knows what the night is gonna show us?  
And we'll go where nobody's gonna know us I was blinded by sympathy  
For a minute, I was strung out  
Got my eyes wide open now  
I can see the storm ahead of me  
I say "go" cause I know it's gonna clean us  
No control, let the physical redeem us This is my confession, yeah  
Think I'll learn my lesson, yeah  
This is my confession, yeah Can you hear me calling out  
Like a siren to a sailor?  
Only trip that last forever  
Let the ocean take us over now  
Gotta know that there's a chemistry between us  
Gonna show that I want you and I need it Let the lightning strike me down now  
As long as we're together  
Can't think of nothing better  
Than a union in the afterglow  
Let it go, all the thinking and the reason  
Here we go to the lovin' and the pleasin' Lay me down, if you know  
Let's go out, I'm ready for  
Lay me down, we can go on  
Gonna keep you for the winter
