Pretty Little Girl

Blink 182

Night and day your eyes are glowing to my beating heart
Oh, it seems like it is fun as my hand is moving up your arm
And you never really know where it goes up until it starts
I've got my eye on you
Whatcha gonna do
I daydream near a stream with the lunar bites
Oh, I listen to the song on repeat from the other night
And I can't picture you but I sure got the feeling right
What a crazy world
Pretty little girl
And we wait from the night in a bed with a breeze
And we're laughing out loud with the craziest news
When you reach for my hand I was scared in your room
We fell on the floor and we started to move
And your hands were like birds as they flew from the coop
Up my back they would climb just as I came unglued
You said
If you break my heart then I'll change your mind
And I will do it again
If you play the part then I will play mine
And I will do it again
If we miss the mark if we hold on tight
We'll be here to try it again
Nineteen as we roll across the bedroom floor
Your eyes they came alive as you're dreaming of our future home
And the kids are growing up as you and I we are growing old
What a crazy world
Pretty little girl
In the rain, with a drink, from the back of the bar
I would raise up my voice, you would raise it up more
We forget that our lives, being a part, it is hard
We thought we are close but it still feels far
Can we learn to get by if we learn to have scars
We learn to forgive and accept who we are
You said

If you break my heart then I'll change your mind
And I will do it again
If you play the part then I will play mine

And I will do it again
If we miss the mark if we hold on tight
We'll be here to do it again
Wait a minute, hold up a second
Don?t leave me here with this feeling
Like I?m the one for regret
And like I never did go for a smoke
Like I never did pull out that grip and then
Stick that knife through my back
Was I supposed to accept it when your words are like
More than just sticks and stones, kind of like a bullet
I don?t tip the lies through my bones and
I came to swallow it
My pride is more than all that I own
So I gotta give it away
And some of the times I?m all the way home
But can?t you see pass me
And see my fucked up home
That made me the demons
The devil is just singing along to the song I write
To the lonely night and I hang up the phone
And bite my tongue cause I know that
Me and you is just only right but one, one, one, one
It?s a cry from the past, we have been through a lot
Every year has been great and a few have been tough
And our kids they?re of age for the stars at the bar
We sit and relax as we?re cheering them on
All the roads to the life to the great to the grave
We started alone, in the end, we?re okay
You said
If you break my heart then I'll change your mind
And I will do it again
If you play the part then I will play mine
And I will do it again
If we miss the mark if we hold on tight
We'll be here to try it again
