

# Right Beside You

## The Generators

How it began, there I am  
In the evening twilight  
A refugee down by the sea  
Moving along on and on  
By a lonesome highway  
And one of these days  
Im gonna set me free, I believe!Weathered and torn  
I stood in the storm  
There Is remain, the sorrow I brought  
And I never thought that Id come in from the rain  
You come to terms  
You live and you learn  
From all the bad breaks  
Its you and you  
In the big bad world facing up to the heart achesBut there I am  
Right beside you  
No one else  
Just you and me  
In the moment  
In the flow of traffic  
Its all getting a bit easier to see
