

Planet Solitude

Shai

Yeah, greetings

This is Blackface

Yeah, listen

In man's highest state of existence

The mind and the universe will be one and the same

In this state, the law that governs your human minds

Will coincide with the same law that commands the planets

To orbit the sun, the law of the universe

Reminiscent of the planets in relation to the sun

Your physical existence will humbly be set in motion

By your minds for one purpose

To manifest the universal law of peace

The ultimate aim in life

Peace, peace

I like that

I'm out

Blackface
