

# Words Don't Mean a Thing

## Taproot

Yesterdays were all the same  
Independent, where were you?  
Nothing's changed, it's not a phase  
Or twoLakeside playing down on the docks  
Like a painting, skipping rocks  
Killing time, awaiting, nothing to be foundNo one to see, no one to believe in me  
Like a suspect walking free  
Anxiety is filling me, I'm through  
So where the fuck are you?You said you'd work to make things right  
You said the worst had passed us by  
You said that I won't have to worry  
You said you'd stay with me, honestly  
Now I know your words don't mean a thingKilling time, awaiting, nothing to be foundNowhere to be, nothing  
to instill in me  
That I'm a part of humanity  
The irony is splitting me in two  
So where the fuck were you?You said you'd work to make things right  
You said the worst had passed us by  
You said that I won't have to worry  
You said you'd stay with me, honestly  
Now I know your words don't mean a thingIt's not my fault that it is here I stand  
It's not your fault that it is here I standYou said you'd work to make things right  
You said the worst had passed us by  
You said that I won't have to worry  
You said you'd stay with me, honestly  
Now I know your words don't mean a thing
