

Dear Hope, Never Let Us Part

[Scan the Sky](#)

Dear Hope, I promise that I'll
Hold my own, don't let us part again
Cause the conflict aroused
Beckoned me to fall into the sea Like passion cut short
The fire spreads
Growing and feeding on us
Drawing the air out of everything Tell me there's another way
The water's so tempting
Tell me there's another way
Tell me there's another way Breathe in slowly
I'm right here The more you know about this world
The angrier you'll become
So don't believe the words
But stay true to what's at heart Don't confuse fate with reason
Don't let anything destroy our Hope
Cause it's all we have left... The clouds we walk are ever-changing
Until we find how simple it is
