

White Dress

Ben Rector

So do you remember?
With your white dress on
It was the end of December
Count the days till dawn I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
I never knew She's coming on Friday
And then the close spark
Cause its just minutes & highways
Till the one I love
The one I love
Till oh...I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
I never knew I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
I never knew, no

I never knew, no
I never knew That I could love
That I could love
That I could love someone
That you could love
That you could love someone like me
Oh, that I could love
That I could love
That I could love someone like
That you could love someone like me
