

# This Lonely Place

## Goldfinger

1, 2, 3, 4 You come around  
To see your boyfriend  
You come around  
To feel the pain  
It was yesterday he tried to use you  
But you still go through it Again you took it away  
Again you let yourself stay I've been around  
This lonely place  
Lonely place before  
I've been around  
This lonely place  
Lonely place before You find out  
He's been lyin' to you  
You find he had another girl  
But still you never  
Stand up for yourself  
You never stand up to him He takes it away  
Again you let yourself stay  
Again you gave it to him  
You said, "It's the last time"  
He does it again I've been around  
This lonely place  
Lonely place before  
I've been around  
This lonely place  
Lonely place before You got a choice  
To leave your place  
Your lonely place behind  
Be true to yourself  
Now and let it go  
It's better than you think Again he took it away  
Again you let yourself stay  
Again you gave it to him  
You said, "It's the last time"  
He does it again 'Cause I've been around  
This lonely place  
Lonely place before  
I've been around  
This lonely place

Lonely place before Now you got a choice  
To leave your place  
Your lonely place behind  
Be true to yourself  
Now and let it go  
It's better than you think I've been around  
This lonely place  
Lonely place before  
I've been around, yeah  
This lonely place  
Lonely place before Turn around  
And see your friend
