

Skylines

Glades

Say you'll hold me
Say you'll hold me to wear
All the lonely you can take the pain away
And only better
More than you could say no
Be more careful so no one and won't be hold in place
Skylines are burning in between
Tonight we're long lost love
Skylines are burning in between us
You and I are runaway runaway
I'm running running
It's late now we can't go back we're breaking
I'm fighting for me
You had your say now go away it's over
Take this moment
Put a silence on it
Wait together driving right past memory lane
Say no goodbyes cause i'm right here with you
Holding your heart till we're old and lonely
Skylines are burning in between
Tonight we're long lost love
Skylines are burning in between us
You and I are runaway runaway
I'm running running
It's late now we can't go back we're breaking
I'm fighting for me
You had your say now go away it's over
Hold me close and never let go
Beat my heart again
Take me with you get me away from here
Hold me close and never let go
Beat my heart again
Take me with you get me away from here
I'm running running
It's late now we can't go back we're breaking
I'm fighting for me
You had your say now go away it's over
I'm running running
It's late now we can't go back we're breaking

I'm fighting for me
You had your say now go away it's over
