

Feed Us

[Serj Tankian](#)

Maybe we believe she was ready to go
In the morning light
Maybe you believe that she was made of gold
In the east where you killed her You lead us when you need to feed us
You comfortable delete us when you need your fetus You cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
Stars look out, goodbye, goodbye She speaks unrehearsed languages from skin
In the morning light
Painting shadows on the faces of the dead
In front of their windows You cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
Before it's too late Do you know that life is ending
As we go, the dots connecting?
We had our chance to save the garden
As it dies our souls will harden With these words chastising your conscience
We're breaking through and praying for transcendence But you deceived us all now Cheat us when you feed us
with the lie
Stars look out and
Cheat us when you feed us with the lie
Stars look out and Cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
The stars look out
