## **Connected**

## **ZRoyal**

No one else will help us to get through

So by ourselves, we'll know just what to doWe are connected, we'll never be alone

We walk together forever down that roadYou and I will share all that we know

So close your eyes and just let yourself goWe are connected, we'll never be alone

We walk together forever down that road

We are connected, we'll never be alone

We walk together forever down that road, roadAnd if you fall behind and don't know what to do

I promise I'll be waiting there for you, for youFollow me into a better day

We'll be alright, no matter what they sayWe are connected, we'll never be alone

We walk together forever down that road

We are connected, we'll never be alone

We walk together forever down that road

Road, road, road
