

A Friend In California

Merle Haggard

L.A. traffic is bad this time of year
But there's a friend of yours in California
Sure wishes you were here
And as you lay your head on your pillow tonight just remember
There's a friend of yours in California sure misses you You've got a friend in California that misses you
You've got a friend in California that sure misses you Fort Worth can get cold this time of year
But this southern California sun is warm
You should be here
And as you lay your head on your pillow tonight just remember
There's a friend of yours in California sure misses you You've got a friend in California that misses you
You've got a friend in California that sure misses you You've got a friend in California that misses you
You've got a friend in California that sure misses you
