

# Misconception

## August Moon

Jump up and down, shorty turn around, making all them heads turn  
I like it, I like it, girl everything you got I like it  
You see her, you wanna meet her? Staring her down like the Mona Lisa  
I hate to break it to ya, I'm already playing for her  
And I got more plays than a football team I'm mighty curious, you're so mysterious  
The way you walk, way you talk like that  
And hiding that treat got me barking like a dog  
Play with me but that isn't right  
I know you want it, now's the time  
I like it, I like it, girl everything you got I like it Chorus:  
Let's take this misconception, and make an understanding Wait stop, that twat? The one that's dressed like a  
Doodlebop?  
Drop it down at your own discretion, 'cause I'm my only competition  
See nobody out there be like me, so somebody start controversy  
'Cause everybody gonna get to see that you're the guy that messed with me? See that girl, yeah, she my  
motivation  
She make me wanna take it to a higher elevation  
Pow, look at now, screaming ai papia, please let me by your mama zita  
Check my temperature, 103? I'm a little bit queezy  
Take it easy, gonna lose me, trying to tease me  
Dam, she's got me topsy turvy Chorus
