Lay Low

Blake Shelton

Think I'll grab a bottle of Patron
When I get off work on my way home
Fill that hot tub full of bubble bath, kick back, relax
Baby you and me and nothing on

Got a weekend coming just in time
We're both needing what I've got in mind
What I got in mind, that's me and you into me and you
Can't wait to get you all alone yea

Lay low, stay home and stay high
Stay up, make love, all night
I wanna run my fingers over every single inch of you
Take my time, takin' it slow
Stay home, stay high and lay low

We'll let our kisses do the talkin' girl

Take each other to another world
Feel like we're a million miles from here
Somewhere out there, without goin' anywhere at all

Lay low, stay home and stay high, yea
Stay up, make love, all night
I wanna run my fingers over every single inch of you
Take my time, takin' it slow
Stay home, stay high and

Lay low, stay home and stay high
Stay up, make love, all night
I wanna run my fingers over every single inch of you
Take my time, takin' it slow
Stay home, stay high and lay low

Stay home, stay high and lay low
