Victim

First Blood

Defend your life, defend your soul
Victims digging our own graves
Terror
Horror
Fear within their veins passed down along a never ending chain
Another victim dies
The lies kill both sides
No regard
No respect for life
Understand the effects kill two ways, killing the life, killing the soul
Fall victim to their lies
Defend a way of life you can't justify
How many more must die? defend your life, defend your soul, but you will pay for what you've done
Set your stake and place a price with no respect for life
Raping, pillaging, someday you will pay
Taking, displacing, someday you will pay
Mock me, belittle me, someday you will pay
Another victim dies
Fall victim to their lies
