If I Go Away

Savatage

Somewhere on that long lonely road
We all stand alone looking for clues
From our different viewsIn the dark I've called out your name
It echoes in vain over again
In an empty roomIf I go away what would still remain of me
The ghost within your eyes
The whisper in your sighs
You see believe and I'm always thereStaring down a long empty hall
Pictures on walls, all with your name
But it's not the sameSearching for the chord I can't hear
Been searching for years, it's somewhere inside
But it's well disguisedIf I go away what would still remain of me
The ghost within your eyes
The whisper in your sighs
You see believe and I'm always thereSomeday I'll take a chance
You find them where you can
They tend to slip away
Those doors to yesterdayForever is a long time they say
Maybe some day, I'll meet you there
If you've time to spare tell me then
Where I can go, where they won't know
Who I have been can we start again?If I go away what would still remain of me
The ghost within your eyes
The whisper in your sighs
You see believe and I'm always there
