The Soviettes

Sitting by yourself alone, don't even bother with the phone. How can you stand to be so mean? Just keep hiding out behind your screen. You sit and spread your shit online. I'm sure it happens all the time. Our dirty laundry stays at home. You need to learn to keep it to yourself. And don't you wonder what they'd say if you could settle down and say it to their face? "I saw her shooting up at V's". "I heard she's pregnant, did you see?". "I heard she's sleeping with them all". Keep it going I know you won't let it go. "I heard she beat them real bad". "I heard they're gonna get her back". "Hey, ,let's get everyone involved". Leave it alone, it's their problem to solve. And don't you wonder what they'd say if you could settle down and say it to their face?
