

# Blindfolded

## Outlast

Walking through this strange and crowded place  
Imagining your face, fighting my way through  
    Oh I feel you getting close with every step  
        With all that I have left  
        I'm reaching out for you  
        If I was blindfolded  
        If my memory was erased  
    If every sign pointed to another place  
        I'd still find you  
        I will still find you  
        I'd still find you  
        If I was blindfolded  
    My fingers trace the outline of your shape  
    And recognize the way you pull me into you  
    Oh you're calling out to me not saying a thing  
        You're everything I need  
    And all that I could never ever lose  
        If I was blindfolded  
        If my memory was erased  
    If every sign pointed to another place  
        I'd still find you  
  
        I will still find you  
        I'd still find you  
    You're the gravity that's taken hold of me  
        Every time I lose my way  
    It's the chemistry more than eyes can see  
        And no matter where I am  
        I will still find you  
        I will still find you  
        If I was blindfolded  
    If my memory was erased  
    If every sign pointed to another place  
        I'd still find you  
        I will still find you  
        I'd still find you  
        If I was blindfolded  
    If my memory was erased  
    If every sign pointed to another place

I'd still find you  
I will still find you  
I'd still find you  
If I was blindfolded
