

Leave You Behind

One Time Mountain

I look into your soul
Decipher what I see
And I'm staring in your face
So you looking back at me
But a broken house of cards
Is the only thing I see So I leave you behind
you do not come with me
you've hurt them before
So I won't let you hurt me
So I leave you behind
you will not come with me
but you still found a way
to haunt me in my dreams You've built up all this guilt
an emotional tragedy
You need someone to love
But you don't know how to be So the Tears come crashing down
Like the silent symphony
"Your Better off alone,
or with anyone but me" So I leave you behind
you do not come with me
you've hurt them before
So I won't let you hurt me
So I leave you behind
you will not come with me
but you still found a way
to haunt me in my dreams Solo - So I leave you behind
you do not come with me
you've hurt them before
So I won't let you hurt me So I leave you behind
you do not come with me
you've hurt them before
So I won't let you hurt me So I leave you behind
you will not come with me
but you still found a way
to haunt me in my dreams The rain is pouring down
and it's getting hard to breathe
I want to save your soul
But I've got to save me
