

# Young

Ayer

Got this feeling that you saved me  
I've been driving with no lights on lately  
I was fading, now I'm craving  
You used a magic spell to me Devotion like an animal  
Hungry like a cannibal  
You control the way that I am Emotion like a shooting star  
Take me with however far  
You control the way that I am Got this feeling that you saved me  
I've been driving with no lights on lately  
I was fading, now I'm craving  
You used a magic spell to tame me And it feels kinda like we are forever young  
And it feels like nothing's gonna tear us down  
And it feels kinda like we are forever young  
And it feels like nothing's gonna tear us down Supernatural's how we're feeling  
We're a fire burning through the ceiling  
What you gave me is the same thing  
I had before my heart was shaking Devotion like an animal  
Hungry like a cannibal  
You control the way that I am Emotion like a shooting star  
Take me with however far  
You control the way that I am Got this feeling that you saved me  
I've been driving with no lights on lately  
I was fading, now I'm craving  
You used a magic spell to tame me And it feels kinda like we are forever young  
And it feels like nothing's gonna tear us down  
And it feels kinda like we are forever young  
And it feels like nothing's gonna tear us down And it feels  
And it feels  
And it feels And it feels kinda like we are forever young  
And it feels like nothing's gonna tear us down  
And it feels kinda like we are forever young  
And it feels like nothing's gonna tear us down
