All The Boys Want

Emily Osment

You pull up outside with your hot headlights
And you're walking up the stairs with a girl on each side
Go in the door like a thunder storm go and
Crash boom boom with the lights on the dance floor
We get down, we get down, we got down
We get down, we get down, we got down
All the girls want boys, boys
And all the boys want someone to let them go
All the girls want boys, boys
And all the boys want someone to let them go
Taking her time 'cause he's on the chase
So she's stringing him along
And she's getting in his head space
Clinical form with their jaws on the floor
And the girls keep score
While the boy's in back burn
So cool down, cool down, just cool down
We get down, we get down, we get down
All the girls want boys, boys
And all the boys want someone to let them go
All the girls want boys, boys
And all the boys want someone to let them go
Well all the boys want someone to let them go
All the boys want, all the boys want
Scientific in my brain
Filling dance inside my veins
Twist me like a hurricane
Numb me up like Novocaine
Scientific in my brain
Filling dance inside my veins
Twist me like a hurricane
Numb me up like Novocaine
All the girls want boys, boys
And all the boys want someone to let them go
All the girls want boys, boys
And all the boys want someone to let them go
Well all the boys want someone to let them go
All the boys want, all the boys want
