I Want to Know If It's Still Possible

Secret Machines

I want to know if it's still possible
To find a place that's ours
Maybe there's a world that's still invisible
A murmur coming from the stars'Cause if it's real then I have never noticed
Hidden by the thoughts that I
Designed and I
Was there the entire timeDon't worry, I'm much too proud
To face the lights in your eyes
Crushing stars, we collide
What makes us?I want to know if it's still possible
Beneath the endless night
Walking past the window to your bedroom
But the curtain's holding back the light
