

# I Want to Know If It's Still Possible

## Secret Machines

I want to know if it's still possible  
To find a place that's ours  
Maybe there's a world that's still invisible  
A murmur coming from the stars 'Cause if it's real then I have never noticed  
Hidden by the thoughts that I  
Designed and I  
Was there the entire time Don't worry, I'm much too proud  
To face the lights in your eyes  
Crushing stars, we collide  
What makes us? I want to know if it's still possible  
Beneath the endless night  
Walking past the window to your bedroom  
But the curtain's holding back the light
