

Bury Me Next to You

Bilal

She turned away, away, away
Yeah, she turned around, she turned around alright
Looking for certain again
Yeah I know, she's always
Each other like rain, each other rain
Like we're roaming tomorrow we grow until it ends
As soon as we get comfortable it changes overnight
Flowers Bury me next to you
Bury
Bury next to you Fall right into the void
Faint light you've drifted upon the mid
Carrying the [?], can't speak the language
What started as one [?] to set it cold Bury me next to you
Bury
Bury me next to you If being me is [?] and broken hearts could love
Like ashes in the sky your twisted affirmation
Are lost in the melding garden of sounds of everlasting heart
Hearts
Hearts Bury me next to you
Bury
Bury me next to you
