Yvr

Hot Hot Heat

Fly into YVR
Get myself in a car
Get to the people that will keep me alive
Frostbitten drunken skids
You make it howl, kids
Something about you, I just trust you tonightSo we head to their pit of shame where they all look the same
We're blind and deaf in here but don't really mind
Get myself in a drink
It always helps to think
Don't need to live too but don't need to dieSee, how you look and how you feel
They're not the same deal
Let's live a lie together
Let's live a lie together
How you look and how you feel
They're not the same deal
Let's live a lie together
Let's live a lieWe were gridlocked like grizzly teeth
Lock-jawed and dropped the key
Bear with me man, better back off and believe it
Acquaintances we hide
This time we let it slide
Tip toe or tumble down
Pick pocket or leave itHow you look and how you feel
They're not the same deal
Let's live a lie together
Let's live a lie together
How you look and how you feel
They're not the same deal
Let's live a lie together
Let's live a lie
