

Carnage

All

You came clearer than ever before
You did what no one else can
Just never follow up when I'm awake
Because I'd hurt you. You'd hurt me too.
There's no explaining, no escaping
You are a dream. This is the longest time
I've been with someone
You are for real and nothing will ever come between us
There's no need to look too deep
I'll just never go to sleep
Put me to shame when I was through
I put you down inside myself
But you manage to do it.
You always do I felt your body as I remember
Did you know you missed the point of dreaming
When you said you needed more and more
You ended up with less
I pulled you out when I got up
This time I have you with me
I beat your pretty face
Everything wet; pillow with tears
Sheets with sweat. I'm tired
I will make this one real
Do it when I'm here
