Empty Hallways

TEAM B

[Screams]The day is falling in empty hallways
A whisper, shadow, phrases
I still fear the words you say
If you leave me you'll be studying the inconsistencies of the discrepancies we choose
By the changes in my moods
I'm keeping the passion, passing the faction of this relation
Let me goI would tell you but you knew
It's not about you
In the past that's through, the past we knew, the past is through with you
It's like anyone but you
I forgot about you
In the past that's through, the past we knew, the past is through with youIt's cold, these empty hallways
Listen to the screaming of your name
(I love you)
Waiting for you to know, waiting for me to show
(I love you)
Latest pretensions past
As I try to understand these metaphor descriptions
no more infidelity with the melody of this melody of this songI would tell you but you knew
It's not about you
In the past that's through, the past we knew, the past is through with you
It's like anyone but you
I forgot about you
In the past that's through, the past we knew, the past is through with you(I love you, I love you, I hate you)
[Screams]I would tell you but you knew
It's not about you
In the past that's through, the past we knew, the past is through with you
It's like anyone but you
I forgot about you
In the past that's through, the past we knew, the past is through with you
(Past is through with you)
