

By My Side

Kasabian

Come on by my side

Come on, both sides

Come on by my side

Come on, both sides

"Step out of the shadows", said the children to their state

You create these armies just to keep them from their fate

No communication as the masses cheat and steal

Stars in constellation, now I know that's who you are

Come on by my side

Come on, both sides

Come on by my side

Come on, both sides

Come on

"No retaliation", said the poet to his kin

Separate the idols and commit your deadly sin

And all this put aside, wanna finish what you start

I'll connect the numbers, you protect my heart

Come on by my side

Come on, both sides

Come on by my side

Come on, both sides

No communication from the poet to his kin

Separate the idols and commit your deadly sin

No communication, wanna finish what you start

I'll connect the numbers, you protect my heart

Come on by my side

Come on, both sides

Come on by my side

Come on, both sides
