

Sexplosion

My Life With the Thrill Kill Kult

Sex, sex is perverted and sick, sex, sex is perverted and sick
Come with me, share the magic, live the dream
Lets go down to groovy street and catch the scene
Well lose ourselves, get our kicks, embrace the beat
Forget whats real and burn out on a love so sweet
Fevers got me walking blind, I cannot see, I've lost my mind
I like to watch the way you walk, I live to hear the words you talk
Id love to know the things you do when no ones there to spy on you
I want to crawl inside your head to kiss your mind and lips of red
I dig the things you do to me, you've lit the fire to set me free, oh baby
Underneath hot white light, give a scream
Takes us up into the sky and sets us free
Well lose ourselves, get our kicks, embrace the beat
Forget whats real and burn out on a love so sweet
Take all you need and leave the rest, now follow me to take
the best
I like to watch the way you walk, I live to hear the words you talk
Id like to know the things you do when no ones there to spy on you
I want to crawl inside your head to kiss your mind and lips of red
I dig the things you do to me, you've lit the fire to set me free, oh baby
Sex is perverted and sick, sex is
perverted and sick
Sex is perverted and sick, sex is perverted and sick
Sex is perverted and sick
