

Instinct (MXXWLL Remix)

BB Diamond

I got that instinct about you
I got that instinct when I'm around you
I got that instinct about you
I got that instinct when I think of you I don't usually hang around
In places I am easily found
It's not my style to act like this
I played it safe won't take the risk Move closer, I feel you
I know what I have to do
I don't want to do this
But you have got to hear it
I always get this feeling
I know where this is leading
But I can't deny this feeling inside
Oh it feels so right
I got that instinct about you
I got that instinct when I'm around you I got that instinct about you
I got that instinct when I think of you
I guess I've broken every rule
He assured me he was never approaching you
I can't seem to hold this back
I know I shouldn't let this moment pass When I saw ya, like the way I do
No one else can do, do
I don't want to do this
But you have got to hear it
I always get this feeling
I know where this is leading
But I can't deny this feeling inside
Oh it feels so right
I got that instinct about you
I got that instinct when I'm around you
I got that instinct about you
I got that instinct when I think of you
I got that instinct about you
I got that instinct when I'm around you I got that instinct about you
I got that instinct when I think of you
I got these instincts about you
I really hope that you feel me too
I got these feeling about you
I hope that you really want me too I got that instinct about you

I got that instinct when I'm around you
I got that instinct about you
I got that instinct when I think of you
