

El Otro Lado

[Josh Rouse](#)

You called me up this evening
'Cause you wanted to know what's going on
You give me ultimatum
'Cause you don't want to feel you are wrong And I tell you that some folks don't evolve
They're content with what they've got
They just sit back and they watch TV You talked about September
Fought about your tastes, they were all mine
What did you know anyhow
When you said I'm lost but there's still time And I tell you that some folks don't evolve
They're content with what they've got
They just sit back and they watch TV Yeah, I tell you that some folks don't evolve
They're content with what they've got
They just sit back and they watch TV
Yeah, but that's not me But one day you'll come around to see the other side of things
One day you'll come around to see the other side of things
Yes, you will You'll come around to see the other side of things
You'll come around to see the other side of things
