

Something Must Break

Joy Division

To waste and choose or raise the dead
With pain behind go straight ahead
Room full of people grouping as one
I can't break out now
The time just won't come To waste and choose which way to go
Decide for me, please let me know
Looked in the mirror saw I was wrong
If I could get back to where I belong
Where I belong To waste and choose which way to go
I paused for one whom signs forbore
If we were immortal we would not bear
Washed up on the beat here
Struggle for air I see you face still in my window
Tormented clouds won't set me free
Something must break now
This life isn't mine
Something must break now
Wait for the time
Well, something must break
