The Girl Next Door

Milkymee

White girl living in the big city
In a big apartment house
She's living with her boyfriend now
She drives off every day for school and work
She washes dishes now
And watches TV on the pull out couch
But every day's the same
White girl moved back to the suburbs
And she finally found a man
Who knows how to take care of her
They bought the perfect little house
And the lawn's well manicured

And she'd never missed a day of work
And every day's the same
White girl couldn't go on knowing
She was just here wasting her time
She drowned in the lake last night
They found her bloated body floating
But she still walks around
Performing all her daily chores
She still don't know what life's about
Cause every day's the same
And she's got no one to love
