

# The Girl Next Door

## Milkymee

White girl living in the big city  
In a big apartment house  
She's living with her boyfriend now  
She drives off every day for school and work  
She washes dishes now  
And watches TV on the pull out couch  
But every day's the same  
White girl moved back to the suburbs  
And she finally found a man  
Who knows how to take care of her  
They bought the perfect little house  
And the lawn's well manicured

And she'd never missed a day of work  
And every day's the same  
White girl couldn't go on knowing  
She was just here wasting her time  
She drowned in the lake last night  
They found her bloated body floating  
But she still walks around  
Performing all her daily chores  
She still don't know what life's about  
Cause every day's the same  
And she's got no one to love
