

# Cherry Blossom Blues

[Ian Thompson](#)

The mood is kicking on the streets and in the bars  
designer hyper wonder drugs and superstars  
with every billboard I feel helplessly seduced  
with all this happening of the times  
no wonder we are out our minds  
The clock is ticking on your precious little life  
he's trying to scrape all he can get out with a knife  
with every dying dream she feels herself denied  
standing with my flag unfurled  
there's something I just got to tell the world  
Before I die oh you poor crazy child  
look me in the eye and say you've had enough of all the suffering in this world when you fall in despair  
do you find there's nobody there  
The rats are licking all the polish off his shoes  
their tongues are poisoned they've got  
cherry blossom blues  
you're such an empty worthless useless lifeless soul  
listen to my point of view there's something  
I just want to share with you  
Before I die oh you poor crazy child  
look me in the eye and say you've had enough of all the suffering in this world when you fall in despair  
do you find there's nobody there  
standing with my flag unfurled  
there's something I just got to tell the world  
Before I die oh you poor crazy child  
look me in the eye and say you've had enough of all the suffering in this world when you fall in despair  
do you  
find there's nobody there
