

# Blood Is Thicker Than Water

## Secrets of the Moon

You can be sure, I'll always do my best to never let you down  
I know you won't let me down  
You're the light that will never leave me  
You light up my way  
I can always count on you  
And I swear  
I will keep it close  
Cause your love's the most precious thing that I've ever had  
And I know you will do the same  
Cause our friendship's what keeps us alive  
I know you won't let me down  
You're the light that will never leave me  
You light up my way  
I can always count on you  
Let me say we are more than friends  
Cause we are brothers and brothers are fucking blood  
And brothers are a fucking family  
Oh, I can't see our future  
But I'm sure, yeah, that we'll be together

I swear  
I will keep it close  
Cause your love's the most precious thing that I've ever had  
And I know you will do the same  
Cause our friendship's what keeps us alive  
I know you won't let me down  
You're the light that will never leave me  
You light up my way  
I can always count on you  
This is my love that will last forever  
I know you won't let me down  
You're the light that will never leave me  
This is my love that will last forever  
I know you won't let me down  
You're the light that will never leave me

This is my love that will last forever
