

Headlights

We Are Scientists

I point my headlights at you
I point my headlights at you Now what'cha getting into
Before you get in too far
'Cause whatever you do
And whatever you are
I want my headlights on you I point my headlights at you
I point my headlights at you Now what'cha getting into
Before you get in too far
'Cause whatever you do
And whatever you are
I want my headlights on you I don't mind the dark 'cause I want you to be
the only thing I see
And I want your headlights...on me Now what'cha getting into
Before you get in too far
'Cause whatever you do
And whoever you are
I want my headlights on you
I want my headlights on you
