Sunburn

Fuel

The sky was dark this morning
Not a bird in the trees
Silence hung suspicious and anxious
Like a blanket covered scream
You were gone
You were not there for me
And I cursed the sky
And begged the sun to fall all over me
This life's not living, living ain't free
If I can't find my way back to me
Let the sun fall down over me
Let the sun fall down
All my friends are searching
Quiet, desperately
Look into their eyes you'll see the faithless crying
Save me, save me, save me
What are they to feel?
Who are they to be?
What am I to do with, do with me?

Just let the sun fall all over me
This life's not living, living ain't free
If I can't find my way back to me
Let the sun fall down over me
Let the sun fall down
Until my eyes cry out
'Til my head is free from doubt
'Til my lungs sigh right out
'Til I'm wiser
Let the sun fall all over me
This life's not living, living ain't free
If I can't find my way back to me
Let the sun fall down
Let the sun fall all over me
This life's not living baby, living ain't free
And if I can't find my way back to me
Let the sun fall down over me
Let the sun fall down over me
Let the sun fall down over me

Let the sun fall down over me
