

Pregame (Zanski Remix)

Bombs and Bottles

(Verse 1)

Whoa

We don't gotta go

There's still people coming in

They're bringing our medicine

And I Know

You wanna see the scene

Dance underneath the lights

Get lost in between the seems Let's take a shot just you and me

To all the possibilities

To seeing all the city sees

In all the ways you don't believe

Let's take a shot for all of us

To getting numb and being young

To seeing love and getting fucked(Hook)

Come take a shot just you and me

Hold me close and don't get lost

The music's loud the smokes a screen

I promise you this will be fun

Come take a shot just you and me

Come take a shot with all of us

Give me a night to set you free

It won't be long till we're all gone(Verse 2)

Now put my hands where they belong

Tell me how you want it all

Play it cool and we'll sneak off

You're mine now baby The club is only blocks away

Just tell your friends you wanna stay

I'm pretty sure they wanna play

Anyway Bodies full of everything

We won't remember anything

Tonight they treat you like a king(Hook)

Come take a shot just you and me

Hold me close and don't get lost

The music's loud the smokes a screen

I promise you this will be fun

Come take a shot just you and me

Come take a shot with all of us

Give me a night to set you free

It won't be long till we're all goneLose Yourself
