

My Love (Song for a Butterfly)

Andreas Johnson

The way you crash into my space
The way you dance into the light
A butterfly beyond my reach
Your beauty wears me out tonight
It tears me up inside
My love if you were my love
If I was your star
If you were my love I would never let you down
The way you drown in his arms into
The way you keep him satisfied
A fatal kiss a lethal scent
Your colours fade to black and white
I lose myself so fundamentally
My love if you were my love
If I was your star
If you were my love I would never let you down
Feel my love
Seek my love tonight
The way you fall before his feet
The way you dance into his light
A butterfly
My love
If you were my love
If I was your star
If you were my love I would never let you down
Love if you were my love
If I was you star if you were my love
I would never let you down
Never let you down
Never let you down
